

AN IMPORTANT MESSAGE I WANT TO SHARE WITH YOU

Good Design should never be limited by a lack of Options, that is why we offer a number of Options that significantly expand the capabilities of our products

I am often asked why my products are so innovative and better than most. It is not only the attention to detail, but having a group of loyal and very capable colleagues that I can trust to contribute the Innovation that I have become synonymous with.

When I put my name on a Product it is because I believe it represents the best of the latest technology.

With Employment in the tank, you should know that all my products are made in the USA and represent the latest energy efficient requirements.

In 2005 I redesigned all my amplifiers to be the most Efficient in the market place using a unique circuit design that I called ADC. This reduces Standby Energy consumption down to .025 of 1 Amp. With a Turn on time of 2 milliseconds no clipping of sound occurs.

I thought you might want to take a peek at our State of the Art Assembly Area, but is the Manufacturing process that allow me to confidently attach my name and stand by our products with a "no quibble" THREE YEAR Guarantee.

Each Product is individually hand finished and tested, before being handed over to Quality Control. This **ADDITIONAL** testing procedure involves more than 10 steps to complete and **NO** Amplifier is shipped unless these testing procedures are rigorously adhered to.

In this day and age, Energy Efficiency, Quality and Made in America are what Nigel B Design is all about.

Products Proudly
